

Natural insulation is the ideal choice, as it is from renewable origin and has great potential for reuse and / or recycling. The interior wall solution presented consists of a light partition made of laminated plaster board, with expanded cork agglomerate insulation inside.

It is also possible to include radiant floor heating, via hot water. If possible, select natural, easy to apply finishes, applied through joint systems, avoiding adhesives and other binding substances.

- 1 Expanded cork agglomerate insulation
Amorim Isolamentos
- 2 Natural wood finishing
Banema
- 3 Natural cork finishing
Wicanders
- 4 Ecocork mortar
SecilArgamassas
- 5 Expanded cork agglomerate insulation
Amorim Isolamentos
- 6 Expanded clay
Argex
- 7 Hydronic radiant floor system
