

When the placement of the insulation is not possible on the outside. In older walls, in which the facade cannot be altered, the appropriate product is GYPCORK.

GYPCORK combines insulation and finish coat in one and is a low embodied energy product, with a high proportion of by-products from other industries and renewable material that contribute to CO2 absorption.

- 1 Exterior stone wall
- 2 GYPCORK board
Gypotec
- 3 Concrete slab
- 4 Expanded cork agglomerate insulation
Amorim Isolamentos
- 5 Natural cork finishing
Wicanders
