

Solution description

Whenever wood covering is applied, that must come from sustainable forests, certified by credible entities. Placing expanded cork agglomerate insulation on the slab between floors improves both thermal and acoustic comfort. For illumination purposes, select accessories specifically dedicated to lighting that only accept low-power equipment. Preferably, more than 75% of all fixed lights shall have low power consumption.

- 1 Finishing | Gypotec Ibérica - Gessos Técnicos, SA
- 2 Insulation | Amorim Isolamentos, SA
- 3 Paint | CIN - Corporação Industrial do Norte, SA
- 4 Mortar | Secil Argamassas
- 5 Lighting fixtures | LEDLUX Unipessoal Lda / WeLED
