

Solution description

Natural insulation is the ideal choice, as it is from renewable origin and has great potential for reuse and / or recycling. The interior wall solution presented consists of a light partition made of laminated plaster board, with expanded cork agglomerate insulation inside.

It is also possible to include radiant floor heating, via hot water. If possible, select natural, easy to apply finishes, applied through joint systems, avoiding adhesives and other binding substances.

1	Finishing Banema - Madeiras e Derivados, SA
2	Insulation Amorim Isolamentos, SA
3	Finishing Wicanders
4	Mortar Secil Argamassas
5	Expanded clay ARGEX - Argila Expandida, SA
